Adherence 2017

JUNE 4 - 6, 2017 • MIAMI

WELCOME FROM THE CO-CHAIRS

Welcome to Adherence 2017! This conference marks 12 years of coming together from around the world to share, support, and sustain scientific advances towards fully leveraging available social-behavioral and biomedical treatments to promote health and well-being of people affected by and those living with HIV.

The Adherence 2017 tracks follow the interacting pillars of scientific and implementation work needed to end the HIV epidemic: prevention, linkage and retention, and antiretroviral therapy (ART) adherence, as well as facilitating movement through the continuum of care – starting with testing and succeeding with durable viral suppression. Our plenaries, panels, oral abstracts, and posters cover the full landscape of efforts to reach the ambitious 90-90-90 targets by 2020. We are honored to play a role in what will undoubtedly be an energizing meeting of researchers, practitioners, advocates, and policy makers from around the world.

We are also eager for this to be a particularly amazing experience as it marks our final meeting as Co-Chairs. We have collaborated on an amazing team to bring you the last four conference and 2017 is our fifth and final. While we are thrilled to offer others the opportunity to co-chair this important annual conference, we will miss the passionate flurry of activities that go into conference creation. The steadfast work of the team at the International Association of Providers of AIDS Care (IAPAC) will continue to support our successors, ensuring a continuity in the unparalleled caliber of what many people refer to as their “favorite conference” of the year.

We are pleased to introduce scientific track chairs as a new aspect of Adherence 2017: Jane M. Simoni, PhD (University of Washington, Seattle, WA, USA) – ART Adherence track; Jean-Jacques Parienti, MD, PhD (Centre Hospitalier Universitaire de Caen, France) – Prevention track; and Thomas Giordano, MD, MPH (Baylor College of Medicine, Houston, TX, USA) – Engagement in Care Continuum track. We wish to express our gratitude to these three individuals who were critical to assembling a sound scientific program across the three pillars of our conference.

We also wish to thank the International Association of Providers of AIDS Care (IAPAC) for their continued support of this unique conference and commitment to strengthening our diverse network of individuals in this important field. This conference would not be possible without considerable contributions from IAPAC as well as from many individuals, including:

- Intellectual and programmatic guidance from IAPAC President/CEO José M. Zuniga, PhD, MPH, who has facilitated the creation of yet another year of high-quality plenaries.
- The IAPAC faculty and ad-hoc reviewers who provided essential guidance in their careful scientific review of abstracts submitted to the conference.
- IAPAC Associate Director of Education Jonathon Hess, LLM, and other staff whose work allows for the successful implementation of the conference.

We are also grateful for our distinguished conference faculty, including our Keynote speaker, John Schneider, MD, MPH, Director of the Chicago Center for HIV Elimination, Chicago, IL, USA; and our Memorial lecturer, Ambassador Deborah L. Birx, MD, the US Global AIDS Coordinator, Washington, DC, USA.

We hope that you fully partake of our next three days together, centered around “actioning the vision” of attaining 90-90-90 targets by 2020 and ending AIDS as a public health threat by 2030.

CONFERENCE INFORMATION

INFORMATION

TARGET AUDIENCE

The target audience for the 12th International Conference on HIV Treatment and Prevention Adherence (Adherence 2017) includes physicians, nurses and nurse-practitioners, pharmacists, psychologists, behavioral scientists, social scientists, public health specialists, epidemiologists, social workers, case managers, peer educators and navigators, and community health workers working in the field of HIV medicine. The conference may also be of interest to individuals who wish to implement and advocate for effective, evidence informed HIV policies and interventions in their respective communities and countries.

STATEMENT OF NEED

The preventative and therapeutic benefits of antiretroviral therapy are only achievable when patients are optimally engaged in a continuum of HIV care, including linkage to care, adherence to treatment, and long-term viral suppression through ongoing engagement in care. Poor or non-adherence to treatment, as well as suboptimal linkage to and engagement in care, can lead to the resumption of rapid viral replication, decreased survival rates, and virus mutation to treatment-resistant strains of HIV. Similarly, linkage and adherence to biomedical prevention interventions is critical to curbing HIV acquisition rates among at-risk populations.

Implementing evidence-based behavioral, clinical, and structural interventions to enhance linkage to and adherence to HIV treatment and biomedical prevention, as well as long-term engagement in the continuum of HIV care, is critical to attain individual, community, and public health objectives.

PROGRAM OVERVIEW

Adherence 2017 will focus on state-of-the-science evidence on best practices and key lessons learned in the field of HIV treatment and prevention adherence since Adherence 2016, and provide a forum for discussions about practical, real-world implementation of behavioral, clinical, structural, and other interventions to maximize the therapeutic and preventative effects of antiretroviral agents.

EDUCATIONAL OBJECTIVES

After completing this activity, participants will be able to:

- Summarize the state-of-the-science for optimizing the HIV care and prevention continua
- Apply evidence-based strategies to enhance adherence to ART in order to mitigate drug resistance and achieve long-term virologic suppression
- Integrate into clinical practice biomedical prevention interventions, including evidence-based strategies to enhance adherence to PrEP

GENERAL INFORMATION

MEETING VENUE

Adherence 2017 is being held at the Loews Miami Beach Hotel. Plenary, Oral Abstract, and Breakout Sessions, as well as the Poster Session will be held on the second level (see the Schedule At-A-Glance and the Hotel Map on pages 2-3).

MEALS

Complimentary breakfast will be provided on Monday and Tuesday during the Breakfast Sessions. Breakfast and the breaks will be in the Americana Salon 3. Please refer to the program for the scheduled Breakfast Sessions and breaks.

INTERNET ACCESS

Complimentary Internet access is available for Adherence 2017 delegates. Wireless Internet can be accessed through the following network:

Network: Adherence2017 Password: adherence2017

SLIDE PRESENTATIONS/ABSTRACTS

Slide presentations will be available at www.iapac.org post-conference. The Program and Abstracts book will be distributed at registration, and electronic versions will be available at www.iapac.org post-conference.

SOCIAL MEDIA

If you have not already done so, please “like” our Facebook page (International Association of Providers of AIDS Care) and join the Adherence 2017 event for live updates on the conference. Join the conference’s social media conversation: #Adherence2017

QUESTIONS

If you have any questions during the conference, please locate an IAPAC staff member at the conference’s Registration Area. If you have any questions post-conference, please contact IAPAC’s Associate Director of Education, Jonathon Hess, at jhess@iapac.org.
