

FTCI and 90-90-90: Denver Experience

Measuring the HIV Care Continua – Re-Examining the Basics of Monitoring the AIDS Response

Sarah E. Rowan, MD

Associate Director, HIV and Viral Hepatitis Prevention Denver Public Health

Adherence 2017

June 4, 2017

- 90-90-90 and the Care Continuum in Denver
- Challenges and issues around measuring and using 90-90-90
- Opportunities/Future directions

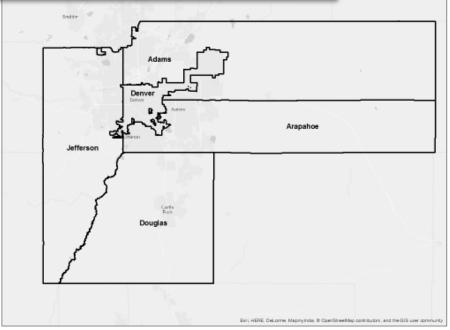

HIV in Metro Denver

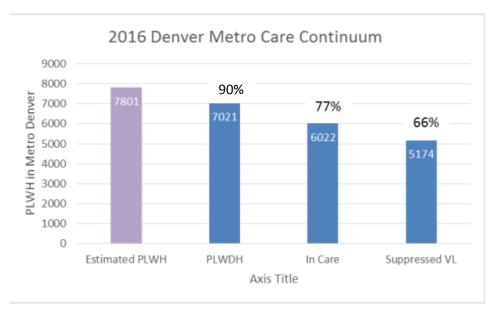

- 75% of PLWH in Colorado reside in 5 county metro area
- 7761 individuals living with HIV (includes undiagnosed)
- 307 new HIV diagnoses in metro area in 2016
 - 88% male; 43% white; 36% Hispanic; 16% black;
 - 73% MSM, 9% MSM-IDU, 5% IDU, 4% hetero
- 20% late diagnoses in 2016

90-90-90 Targets

90%

Diagnosed

 Percent of Individuals Living with HIV Who Know their Status

90%

On ART

 Percent of HIV-diagnosed Individuals Who are on ART

90%

Suppressed

 Percent of Individuals Who Are on ART and Have Suppressed Viral Loads

2016 Progress, Metro Denver

90%

Diagnosed

 Percent of Individuals Living with HIV Who Have Been Diagnosed and Are Aware of their Status

86%

In Care

 Percent of HIV-diagnosed Individuals Who are Engaged in Care

86%

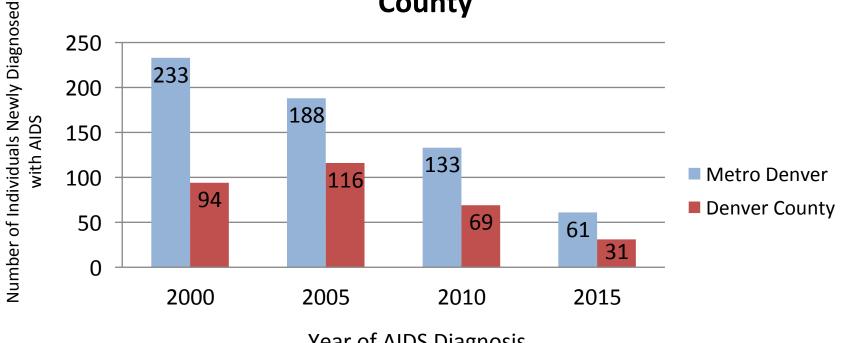

Suppressed

 Percent of Individuals Who Are Engaged in Care and Have Suppressed Viral Loads

New AIDS Cases, Metro Denver and Denver County

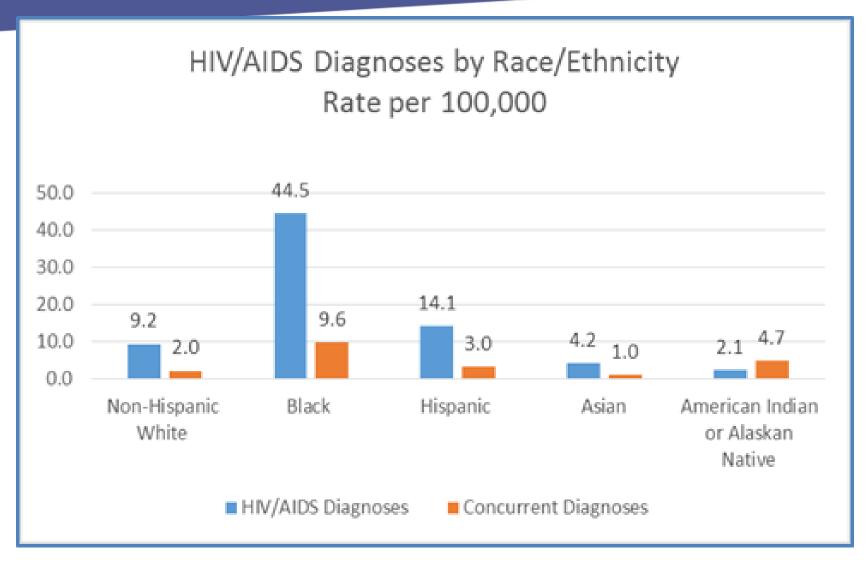

Year of AIDS Diagnosis

Care continuum by subgroups

Factors affecting estimate of PLWDH

Prevalence

- Censoring for outmigration updated eHARS
- In-migration for marijuana?
- Rapid population growth for many reasons

Incidence

- Absolute # vs rates
- Approximately 40 more individuals diagnosed in 2016 than 2015
- Late diagnoses decreased
- More people testing for HIV bc of PrEP?

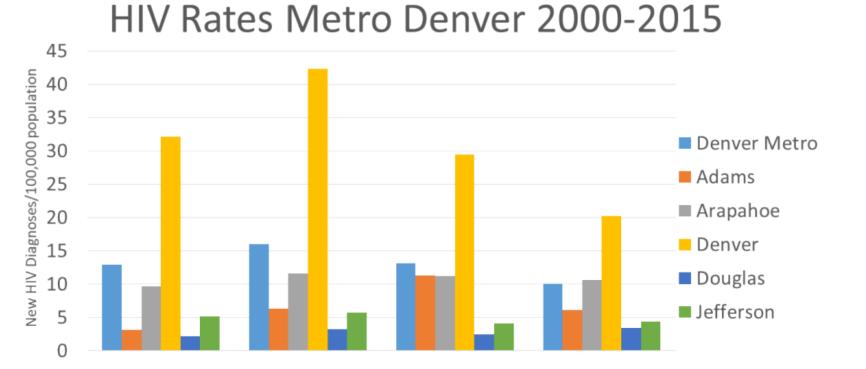

Population Growth

Population growth in Denver: 2% per year for the past 10 years

2005

Year

2010

2015

2000

Defining the care continuum

- Include recently diagnosed?
 - Over-estimates engagement/retention
 - Viral suppression rates will be lower

- Include PLWUH?
- Confusion with 90-90-90 vs care continuum

Lack of data

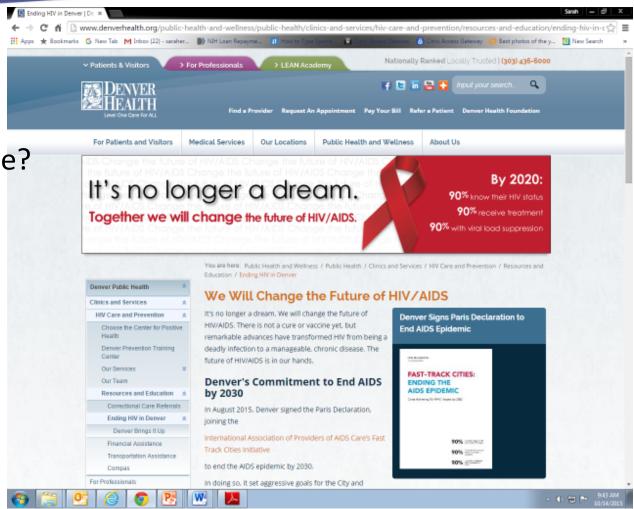

- Derivation of undiagnosed estimate
- Linkage data not reliable with labs only
- ART data not widely available

Public facing data

- Is it accurate?
- At least close?
- Is it understandable?

Opportunities/Future Directions

- Draft report / FTC task force input
- What to report and how to report it

Ending in Metro Denver

Quarterly MV monitoring report for Adams, Arapahoe, Denver, Douglas and Jefferson Counties

Background In August 2015, Denver signed on to the Fast Track Cities Initiative to end the AIDS epidemic by 2030. Given the flow of people and resources throughout the five counties that comprise

Opportunities/Future Directions

- Data-driven questions
- Data-driven action plans
 - Who and where are we testing? Are we in line with new HIV diagnoses? With late testers?
 - Who is not linking quickly?
 - Who is out of care or not virally suppressed?
 - Care continua by subgroups
 - Who is on PrEP?
 - Where are HIV prevention services offered? Is it enough?

Strategic Plan to End the HIV Epidemic in Metro Denver

Stigma

Zero Stigma

Measuring stigma

- Disparities
- Improved care continua
- Utilize NHBS
