- Health Nutrition

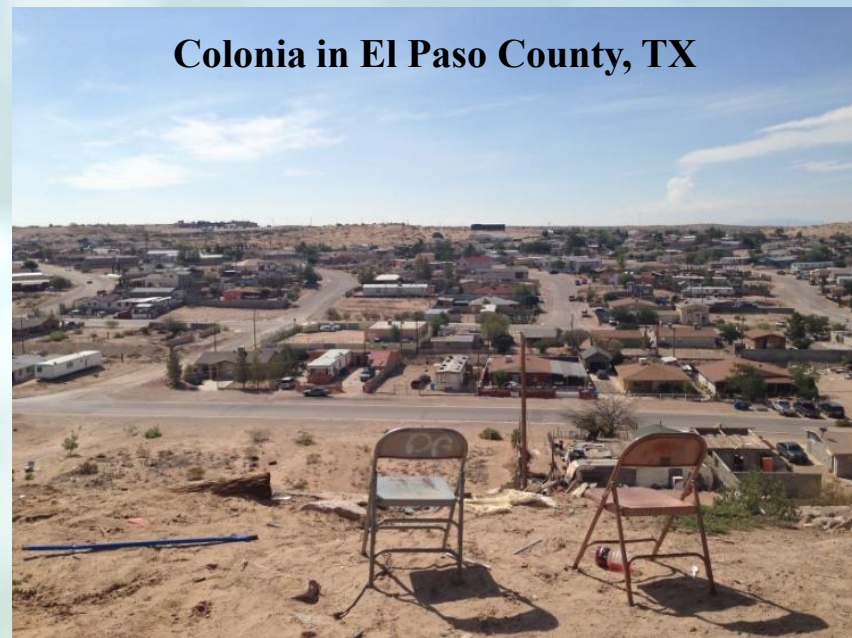

Evidence Based Interventions

Intervention	Individuals reached as of date
Safer Sex Awareness	559
Violence Prevention	637
Bystander Intervention	734
Nutrition Education	548
Total	2478

11,604 community members reached through social marketing - Facebook, Instagram, flyers, etc.

Clint, Texas

Colonia in El Paso County, TX

Priority Communities in El Paso County, Texas

San Elizario, Clint, Fabens, Socorro

Testing Indicators as of Date

- **1043** women were offered HIV/HCV testing
 - **83.8%** of the women (874) received an HIV test
 - **66%** of the women (688) received a Hep C test
- **91.8%** were Hispanic (**53.8%** between ages 18-34)
- **44%** have previously received an HIV test
- **8.8%** have previously received a Hep C test
- **66%** engaged in unprotected sex within a significant other in a monogamous relationship in the past 30 days

Implementation Issues Encountered

- Existing stigma to HIV and discussion of sexual health
- Barriers to client follow-up due to the US-MX border milieu
- Training personnel for multi-site interventions

Recommendations

To enhance dissemination of EBIs, retention and follow-up:

- Engaging network members (males in particular) in bystander interventions
- Selecting EBIs to address various contexts of HIV and SUD risk
- Engage students in dissemination and outreach
- Training promotoras in intervention delivery and recruitment of clients
- Providing testing and screening with EBI classes
- Working with community partners like, the Department of Public Health and violence prevention centers
