Student visit in Cambodia

1st prize, poster competition in China

Event in Myanmar

School talk in Indonesia

Condom Campaign & Youth in Asia

Mayors in Indonesia show commitment to combat HIV/AIDS

AHF Indonesia has successfully lobbied 27 mayors in West Java to sign a HIV/AIDS declaration

The declaration was signed in early August in Bandung. Below are the four main key points on the declaration:

- 1) To increase comprehensive knowledge of HIV-AIDS among youth and women;
- 2) To increase HIV testing coverage;
- 3) To improve treatment services of HIV-AIDS regardless the ability to pay;
- 4) To reduce stigma and discrimination of PLHIV.

It is a milestone in combating HIV/AIDS in Indonesia. AHF Indonesia will prioritize the work where these mayors are responsible for and will continuously working with other local partners in Indonesia to realize the declaration.

Keeping the promise
