PEOPLE LIVING WITH HIV

Global Plan* (2011-2015)

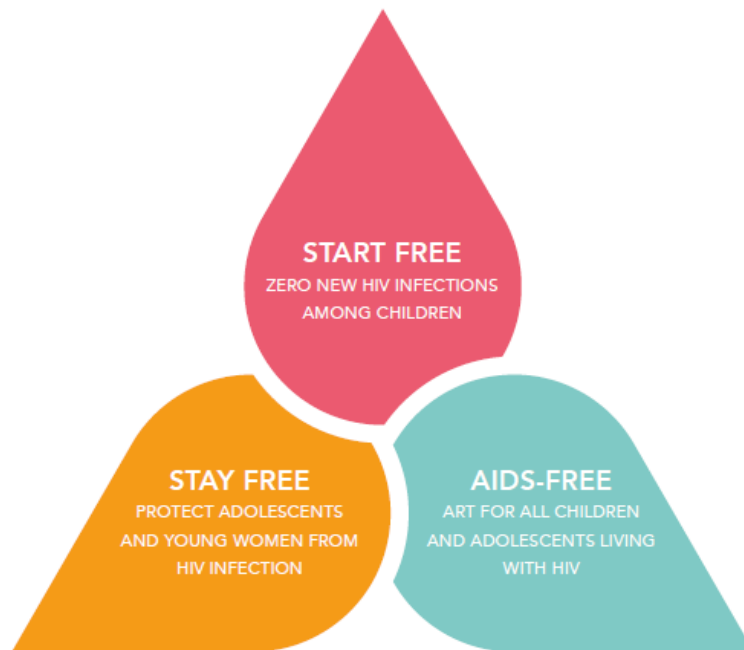

Global Target #1	Global Target #2
Reduce the number of new HIV infections among children by 90%	Reduce the number of AIDS-related maternal deaths by 50%
↓	↓
Progress achieved: Target #1	Progress achieved: Target #2
New HIV infections among children reduced by 60%	AIDS-related deaths among women of reproductive age reduced by 43%

*Global Plan Towards the Elimination of New HIV Infections Among Children by 2015 and Keeping Their Mothers Alive, in 21 priority countries

HLM Targets: 2018 and 2020

Target	2018	2020
Start Free: New infections in children HIV+ pregnant women on ART (%)	<40,000 95%	<20,000 95%
Stay Free: New infections in adolescents/young women VMMC (men, focus on ages 15-29)		<100,000 25,000,000
AIDS Free: Children (age 0-14) on ART Adolescents (age 15-19) on ART Children on ART (%)	1,600,000 1,200,000 95%	1,400,000 1,000,000 95%

Ending AIDS Among Children, Adolescents and Young Women by 2020

Accelerated Fast-Track Approach

- Co-convened by UNAIDS and PEPFAR
- Launched at the UN General Assembly High Level Meeting on HIV/AIDS (June 2016) & at AIDS 2016 in Durban (July 2016)
- Builds upon the Global Plan 2011-2015, DREAMS, ACT

AIDS Free: Prioritizing actions that are most urgent to reach pediatric and adolescent treatment targets

Country Consultations

- **High-level Ministerial Dialogue in Geneva (Dec 2016)**
 - Convened by UNAIDS to engage political leaders (10+ Ministers of Health)
- **Ministerial Progress Review in Geneva (June 2017)**
 - Convened by UNAIDS and PEPFAR to review progress against Start Free, Stay Free, AIDS Free targets
- **AIDS Free workshop in Cote d'Ivoire (December 2017)**
 - Involved 21 countries on how to scale up timely diagnosis, treatment and care for children and adolescents

Rome Action Plan for Scaling Up Early Diagnosis and Treatment of Children and Adolescents

November 2017 set of concrete commitments among stakeholders from the public, private, intergovernmental, and non-profit sectors centered around the need to:

- **focus** in on a limited set of priority formulations for children (the “PADO list”);
- **accelerate** their development, approval, and roll-out; and
- **collaborate** more closely on the technical, financial, and political elements of pediatric ARV R&D and uptake.

We are not on track

TABLE 5.1 Start Free Stay Free AIDS Free targets and 2017 status

Target	Status in 2017
By 2018, reduce new HIV infections among children to less than 40 000 per year and to less than 20 000 by 2020.	180 000 [110 000–260 000]
By 2018, reach and sustain 95% of pregnant women living with HIV on lifelong antiretroviral therapy.	80% [61–95%] (Priority country progress in Figure 5.2.)
By 2020, reduce the number of new HIV infections among adolescents and young women to less than 100 000.	340 000 [200 000–490 000]
By 2020, provide voluntary medical male circumcision to an additional 25 million adolescent boys and men, with a focus on young men aged 15–29 years.	6.9 million
By 2020, provide antiretroviral to therapy to 90% of all children living with HIV and at least 1 million adolescents living with HIV.	52% [38–68%]
