Cutting-edge medicine and advocacy regardless of ability to pay
Challenges to AIDS Control in the Region

Mass HIV screening of general population (not high-risk groups)

Centralized HIV system, disintegration of services

Bureaucracy, stigmatization, paternalism

Lack of evidence-based approach

Workforce shortage, high staff turnover

AHF Europe Care Model As a Response to Challenges

1. Targeted to high-risk groups outreach rapid testing with linkage
2. Decentralized ART, integrated care (HIV, TB) in one location close to client
3. Simplified procedures, staff education on service provision and client-orientation
4. Regular data collection and quality review
5. Task-shifting, payment to staff based on performance
AHF RT programs in Russia, 2014-2015

Number of newly identified cases
