

LONDON

FAST-TRACK CITIES 2019

SEPTEMBER 8-11, 2019

BARBICAN CENTRE

CONFERENCE DESCRIPTION

Fast-Track Cities 2019 will be the first international conference of more than 250 cities that are accelerating their responses to HIV, tuberculosis, and viral hepatitis (HBV and HCV) – diseases cited as urban health priorities in the New Urban Agenda as well as the *Paris Declaration on Fast-Track Cities*.

Organized by the International Association of Providers of AIDS Care (IAPAC), in collaboration with the Joint United Nations Programme on HIV/AIDS (UNAIDS) and other partners, the conference will take place September 8-11, 2019, at the Barbican Centre in London, UK.

The conference's aim is to highlight successes achieved across the Fast-Track Cities network, address cross-cutting challenges faced by local stakeholders, and share best practices in accelerating urban AIDS responses, inclusive of co-infectious diseases and comorbid conditions. The conference will include two half-days of pre-conference events followed by two and a half days of conference featuring plenary sessions, panel discussions, and abstract presentations.

INTENDED AUDIENCE

An estimated 800 delegates are projected to attend Fast-Track Cities 2019. Delegates will include elected officials, public health department representatives, clinical/public health researchers, healthcare payors, donors/grantors, clinicians, service providers, and civil society advocates from current and prospective Fast-Track Cities.

CALL FOR ABSTRACTS

Multiple types of research will be encouraged for abstract submission, including behavioral science, clinical research, community participatory research, health economics, implementation science, operational research, and public policy.

Abstracts accepted for Fast-Track Cities 2019 will be presented during the conference's oral abstract or poster sessions. Abstracts must be submitted online by April 5, 2019, at www.iapac.org/conferences/fast-track-cities.
