**EDUCATION** 

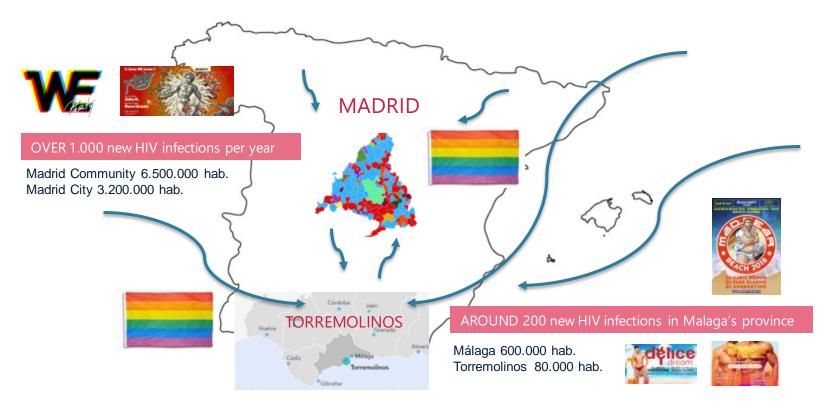

**RIGHTS** 

Since 1993 promoting DIVERSITY in society and responding to its needs, around these three main areas, specially in the most vulnerable groups: LGTBI, women, youth, migrants and others.

community social innovation #welovediversidad

### WHY 90X90X90 IN URBAN SETTINGS

#### WHY 90X90X90 WITH THE COMMUNITY

#### TO RAISE AWARENESS ABOUT SCIENCE and FACE STIGMA

- We moved <u>from CD4 account</u>, waiting for the treatment initiation, to a new trend: <u>test and treat</u> and viral load.
- Some <u>clinicians</u>, or <u>community members</u>, <u>STILL did not agree</u> with this new approach, specially regarding viral load, detectability & zero options to transmit, but the Fast Track initiative helped on this new approach.

#### TO FOLLOW UP SCIENCE and participate in DECISION MAKING P.

• We were <u>contributing</u> not only in prevention efforts but also in a <u>scientific approach</u>: adherence programs, pair educators, early diagnoses with our screening,... WE REALIZED THAT WE SHOULD BE PART OF ANY STRATEGY'S STEP AND DECISION.

#### TO HAVE A VISION LINKED WITH THE STRATEGY

- With 90x90x90 was easier to do our counselling and programs
- It's clearer for the community members: they need to test, if it's <u>negative STRENGTHEN PREVENTION</u>. If it's <u>positive TREATMENT, ADHERENCE AND UNDETECTABILITY</u>

#### WHY 90X90X90 WITH THE COMMUNITY

# NOTHING ABOUT US WITHOUT US

#### 2014: GETTING TO KNOW 90X90X90

- We create our community campaign #PLACAJEALVIH (HIV Touch Down) because of the partnership with Madrid Titanes, the first LGTBI Rugby Club in Spain and also with the meaning to fight and stop the HIV raising up numbers in the country.
- 40 CAMPAIGN AMBASSADORS participated from the most vulnerable communities: LGTBI and youth.
- Also more than 150 people from those communities were taking pictures of the campaign to use in social networks, spreading the Paris Declaration strategy in a community approach and language

### 2015: HOW TO ACHIEVE THE 90X90X90

- We introduce the PREVENTION COMBINED PACKAGE, which includes not only the usual tools for the HIV prevention but also other crucial factors:
  - CONDOM
  - LUB
  - PEP
  - PrEP
  - HIV TEST
  - STIs TEST & CONTROL
  - UNDETECTABILITY
  - SEROPHOBIA
  - CHEMSEX / DRUG USE
  - SEXUALITY EDUC.

### 2016: PEP & PREP MESSAGE. FTC MADRID

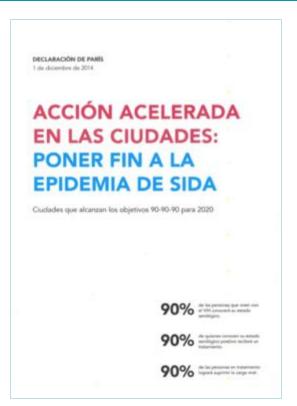

#### 2017: FROM SILENCE TO ACTION

- NO IMPLEMENTATION from the city council
- NO RESPONSIBILITY on commitment
- NO ACTION or required leadership

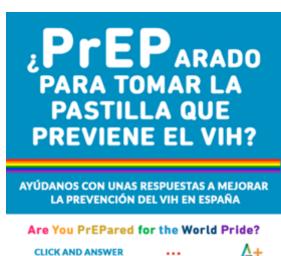

Apoyo Positivo started different meetings with stakeholders and Madrid's Council, following this idea that Paris Declaration is the best tool to end HIV beside the community

## 2017: MADRID FAST TRACK

CLICK AND ANSWER SOME QUICK QUESTIONS!

Apoyo Positivo leds an answer to the 90-90-90 compromise in Madrid, not only coordinating new activities, actions and the City Council Response but also involving other key stakeholders as: National AIDS Research Network, National AIDS Platform (CESIDA), Harm Reduction Centers, Public Health Dep.

#### 2017: MADRID FAST TRACK

#### 2017: WORLD AIDS DAY

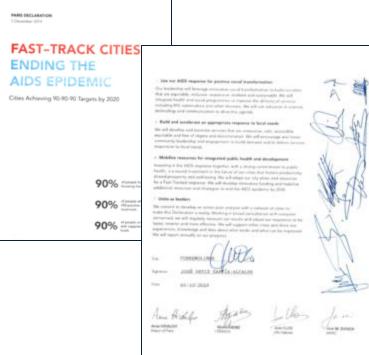

APOYO POSITIVO organized beside the Madrid City Hall and Madrid FTC a conference about the compromise and how is the situation and next steps, and we launch the new campaign INTRANSMISIBLE! Following U=U

#### 2017: FAST TRACK TORREMOLINOS

#### 2018: MADRID 1 YEAR ACTION PLAN

#### Elaboración de la cascada de cuidados de Madrid

Se trata del primer objetivo que la estrategia Fast Track Cities marca dentro de las metas para el primer año de trabajo, que permite determinar la situación epidemiológica de partida. En nuestro contexto, la Comunidad de Madrid, a través de la Subdirección General de Epidemiología, es la que tiene competencias en vigilancia, y por tanto capacidad para proveer los datos necesarios para construir la cascada. Por su parte, el tratituto de Salud Carlos. III 85CHII ha trabalado en un provecto europeo para dibular la cascada a nivelestatal, y han decarrollado un modelo que piodría ser adaptado para el casa de Madrid

Situación de partida: Un equipo de traliaio con representantes del instituto de Salud Carlos III y de la Subdinección General de Epidemiología se reunieron el 6 de febrero para identificar las posibilidades de crear la cascada de Madrid con lis datos disponibles. Se fid un placo de so meses para identificar si el modelo utilizado por el grupo del SCII puede aplicarse a los datos dispositions.

Necesidades identificadas: Existe una falta de personal en la Subdirección General de Epidemiologia de la Comeieria de Sanidad que impide tener los datos actualizados, lo que limita las posibilidades de desamullar la cascada de quidados en Madrid actualizada a 2016. Senia necesario reforzar el equipo con el abantivo de reducir el retraso en la notificación, por lo que se propone buscar financiación para un contrato de 6 meses.

Extidad motora: Conveyena de Sanidad de la Comunidad de Maded

#### Cuadro de actores implicados: quién es quién en la cascada de cuidados.

Además de la cascada, se plantes llevar a cabo un trabajo inicial de identificación de actores implicados que puedan contribuir al cumplimiento de los objetivos de la estrategia, más allá de los institucionales -representados en este grupo de tratajo- induyendo también ONGs y asociaciones, así como losinterfocutores a mivel de SARAC. Se identificará a cada actor con la barra de la cascada sobre la que tenga cassodad de incidir. El obietivo del cuadro de actores es que estos se conoacan y reconoacan entre si como agentes capaces de mesorar la situación del VIH en Madrid, así como identificar sobre qué barrade la cascada tienen mayor capacidad de acción y con qué a sciones entratégicas. macretas.

#### 2018: FAST TRACK TARGETS BESIDE COMMUNITY

Our campaign #placajealVIH & #INTRANSMISIBLE has been the egine to develop differents activities, action and projects, and try to get the Global Target for HIV prevention and other issues related with Sexual Healtth and the most vulnerable communities. Stronger partnerships in Fast Tracks

#### 2018: FAST TRACK TARGETS BESIDE COMMUNITY

#### 2018: FAST TRACK TARGETS BESIDE COMMUNITY

## WHAT WE HAVE LEARNT!

- A. We've raised awareness about science and Global HIV Prevention and treatment targets, with the clinical and researched information, helping us to face Stigma
- B. We've been following science up and the different treatment processes and we've could participate better in the decision making process.
- C. As NGO we have now a VISION and resources and ideas developed to contribute to the HIV end.
- D. Political compromise is A MUST. No way to move forward without the public administration implication, power and resources.
- E. FTC is a new way of getting the right people together, with common goals and skills and organize the HIV response after many years of breakdown as one: HIV response joined movement.
- F. ALL ABOUT STIGMA: against HIV and most vulnerable communities in the public system, inside the own communities and against ourselves because we are just an NGO.

#### WHAT WE HAVE LEARNT!

## NOTHING ABOUT US WITHOUT US

## 2019: CASA, OUR FAST TRACK MODEL

It's not only important receive assistance to a health or sexual problem, it's more trascendental, for people, feel a secure place themselves and work in the prevention of any problem or issue to solve.

That's why we've created CASA, a community Center for diversity and sexual health.

SEXUAL HEALTH (CHECKPOINT) - MENTAL HEALTH AND THERAPIES - WELLBEING - COMMUNITY

**#YaEstásEnCASA** 

## 2019: CASA, OUR FAST TRACK MODEL

#### A safe place for the diverse community

CASA Lavapiés, Madrid CASA Manuel Becerra, Madrid CASA Torremolinos

"If you think you are too small to have an impact, try to sleep with a mosquito in your room"
