PEOPLE LIVING WITH HIV

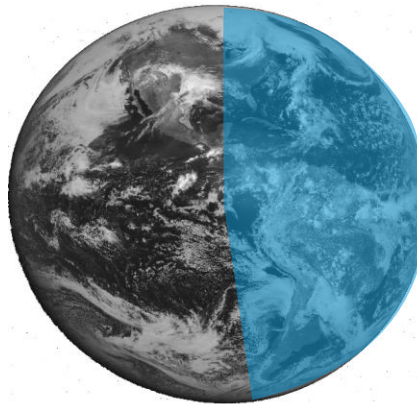

Urban growth changes

YEAR 1970

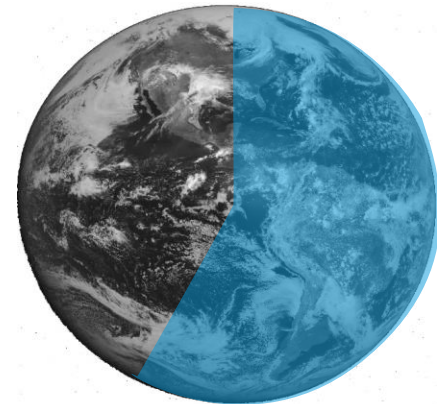

63% RURAL
URBAN 37%

YEAR 2000

53% RURAL
URBAN 47%

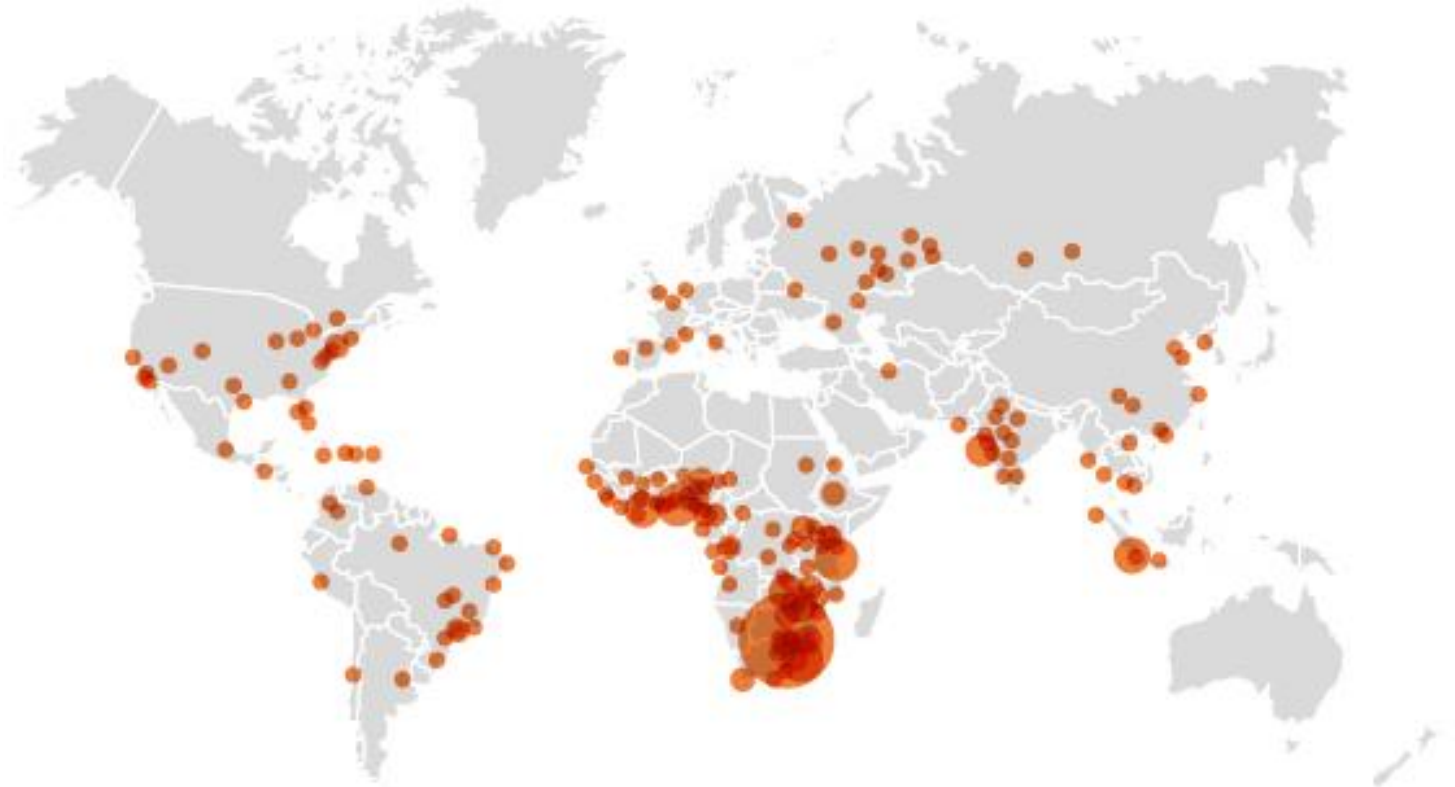

YEAR 2020

44% RURAL
URBAN 56%

HIV burden in cities

The 200 cities with the largest estimated number of people living with HIV

Essential blocks of good health systems

1. Leadership and governance

2. Financing

3. Data and information

4. Medical products, vaccines, and technologies

5. Health workforce/Service delivery

Health, urban governance and leadership?

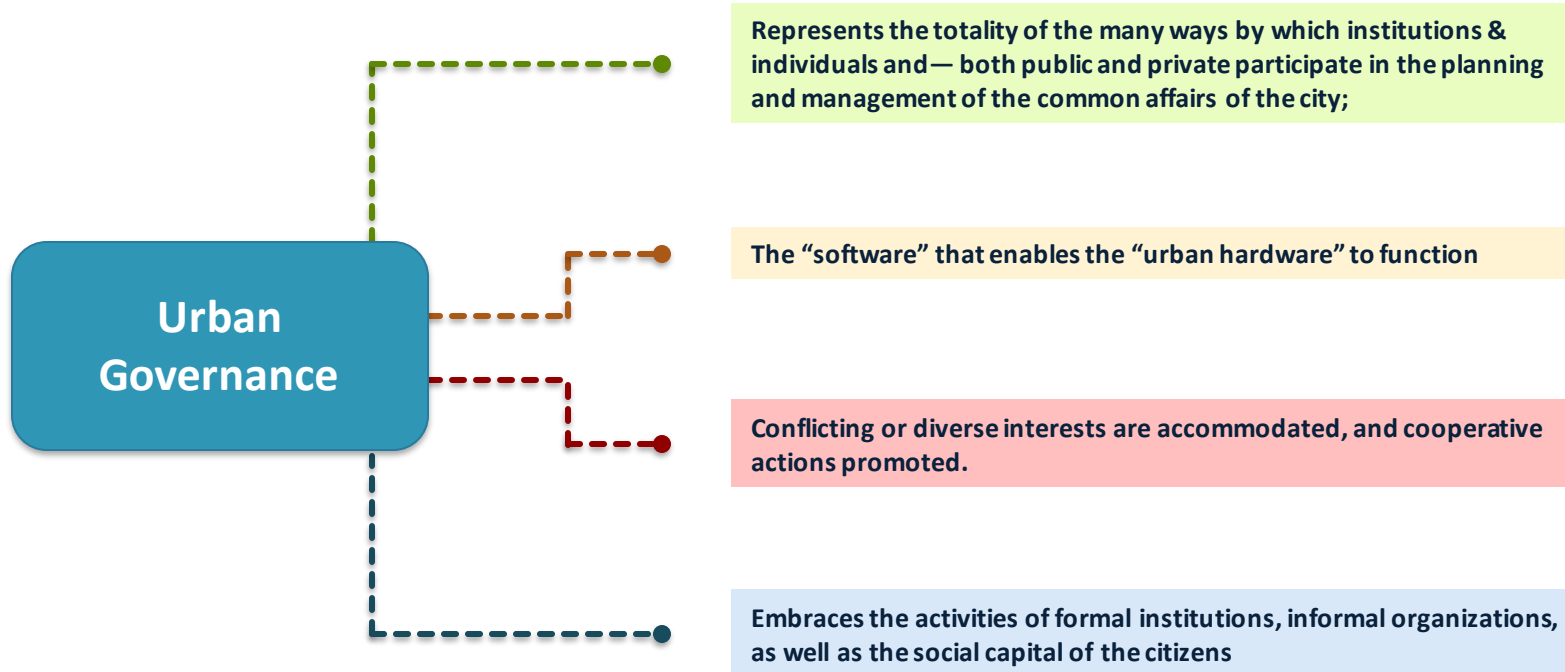

WORLD BANK GROUP

- Traditions and institutions for exercising authority
- Process for selecting, monitoring and replacing govt.
- Capacity of government to formulate & implement policies
- Respect of citizens and the state for institutions

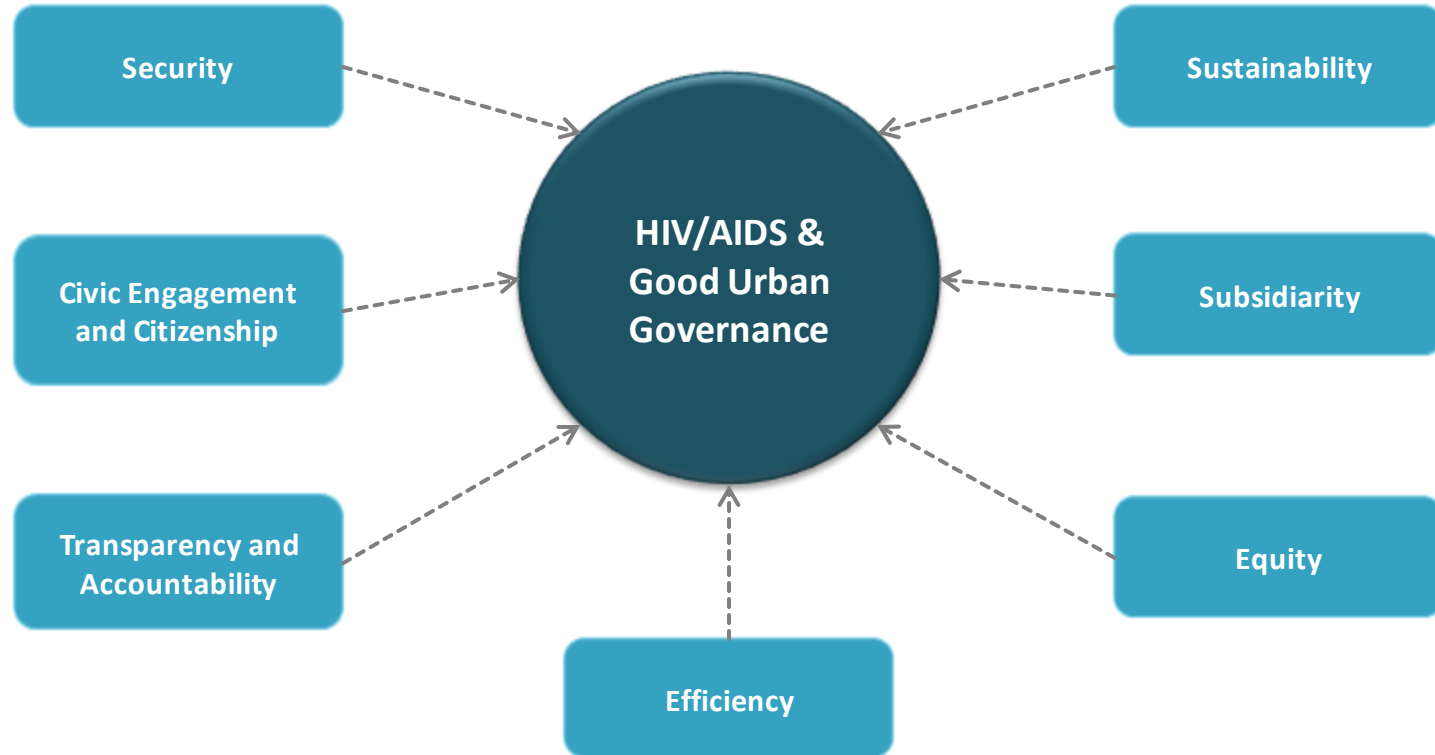

UN HABITAT
FOR A BETTER URBAN FUTURE

- The relationships not only between government and state agencies, but also between governments and communities and social groups

Urban Governance

Norms of Good Urban Governance

Governance, health systems and action

Health System

...includes “all the organizations, institutions, and resources that are devoted to producing health actions.

A Health Action

... defined as any effort, whether in personal health care, public health services or through intersectoral initiatives, whose primary purpose is to improve health

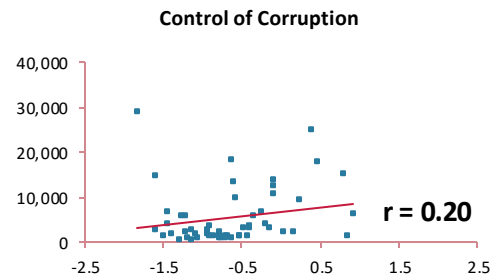

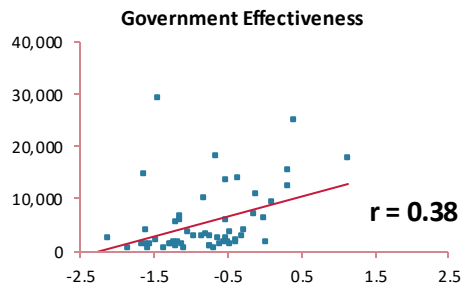

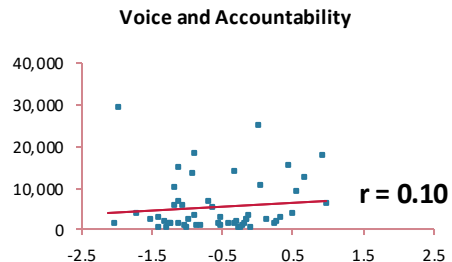

HIV/AIDS systems governance in fast urbanizing world...

- Effective governance of the HIV/AIDS response requires a multisectoral approach
- HIV/AIDS impacts all the social and economic sectors within a country
- A comprehensive response involves other sectors, e.g.
 - Finance,
 - Education,
 - Labor,
 - Transportation,
 - Military,
 - Policy,
 - Women, and
 - Young people

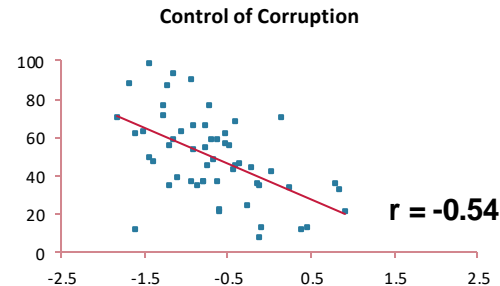

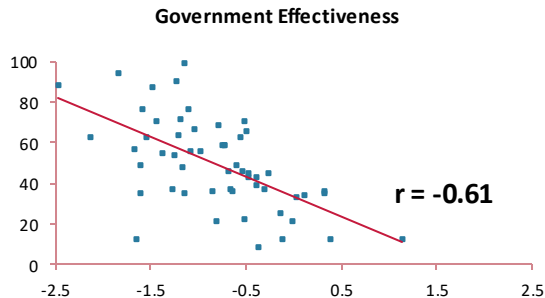

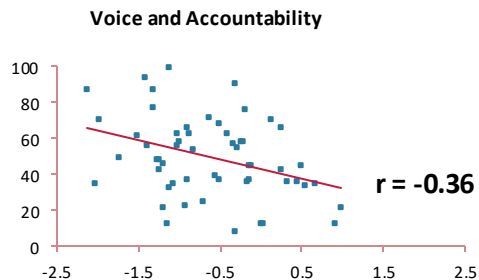

Linkages between leadership/governance and prosperity

Governance and GDP per Capita

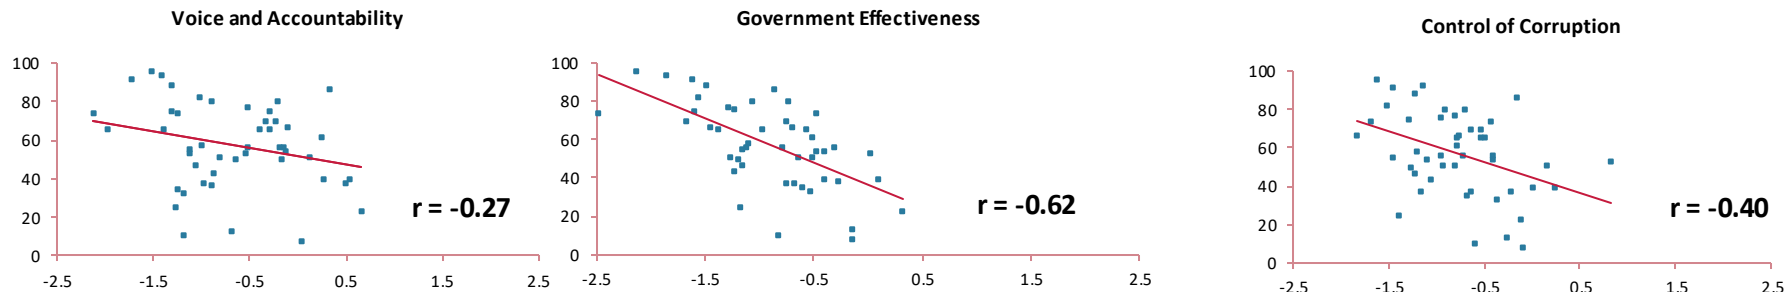

Governance and Infant Mortality

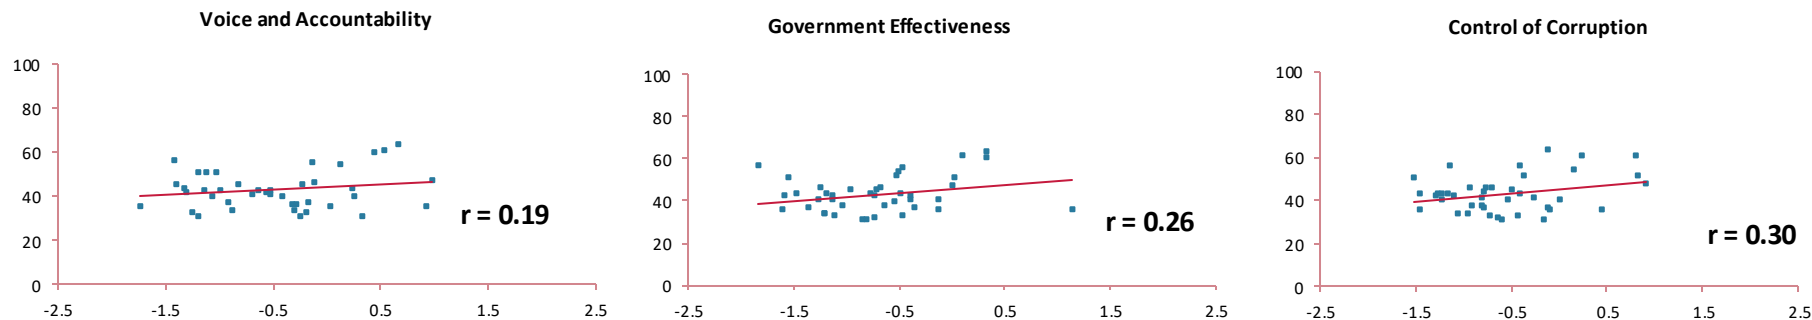

Linkages between Governance and Prosperity (Cont'd)

Governance and Proportion of Urban Population living in Slums

Governance and Income Inequality (Gini)

Financing

Financing is key for the success of a functioning health system.

Sources of funding

Basket
funding

Project
funding

- Mobilizing local resources is key but usually challenging.
- With a city-centered approach, new mechanisms that support local government health systems financing are key.

Information and data

Health Information System (HIS)

Generated sound and reliable health information

Decision makers

Identification of problems and needs

Evidence based decisions

Formulation of health policy and allocation of scarce resources

Medical products

Timely procurement

Ensure access to essential medical supplies and deliveries in right quantities and quality—safety and efficacy

Prices and accessibility

Must be well priced to allow the reach of every citizen

Innovating new products

Ensure new and more reliable products are made available over time

Urban Health workforce

Workforce with right skill sets and experience, and a mix of specialization.

A well performing health workforce works in ways that are more responsive, fair, and efficient, to achieve the best health outcomes.—balancing resources, mix of staff, distribution, competency and productivity

The City Prosperity Initiative (CPI) is a good platform for translating urban data to policies

UN-Habitat's City Prosperity Initiative has collected data across 450 cities and 72 indicators, which is complemented by data from a global sample of 200 cities. It offers a unique platform to study the systems of cities across several indicators.

 **450** cities

 **72** urban indicators

The Origin of the Initiative

A tool based on Six Dimensions

The Wheel of Urban Prosperity

Concluding Remarks

1

Urban governance for fast tracking HIV/AIDs key given the global rapid pace of urbanization and the need to address Goal 11 and other relevant goals of the SDGs

2

Need for continuously strengthening the capacity of city authorities to address current and emerging urban health challenges

3

Good urban governance can only emerge in a context of reliable data to inform policy

4

Removal of bureaucratic impediments that hamper governance in many cities

5

Creating a favourable business environment

6

Need to involve the all stakeholders and partners in strengthening health systems

Thank You
