- 18,805 (46%) was reached and tested in 2016

Community-Based HIV Screening

Objectives

- To increase the number of HIV testing.
- To engage the high risk and hard to reach key population that are afraid to be expose and have to time to go to clinic.

QC Government hired CBS Motivators

4 Days Training on HIV Screening

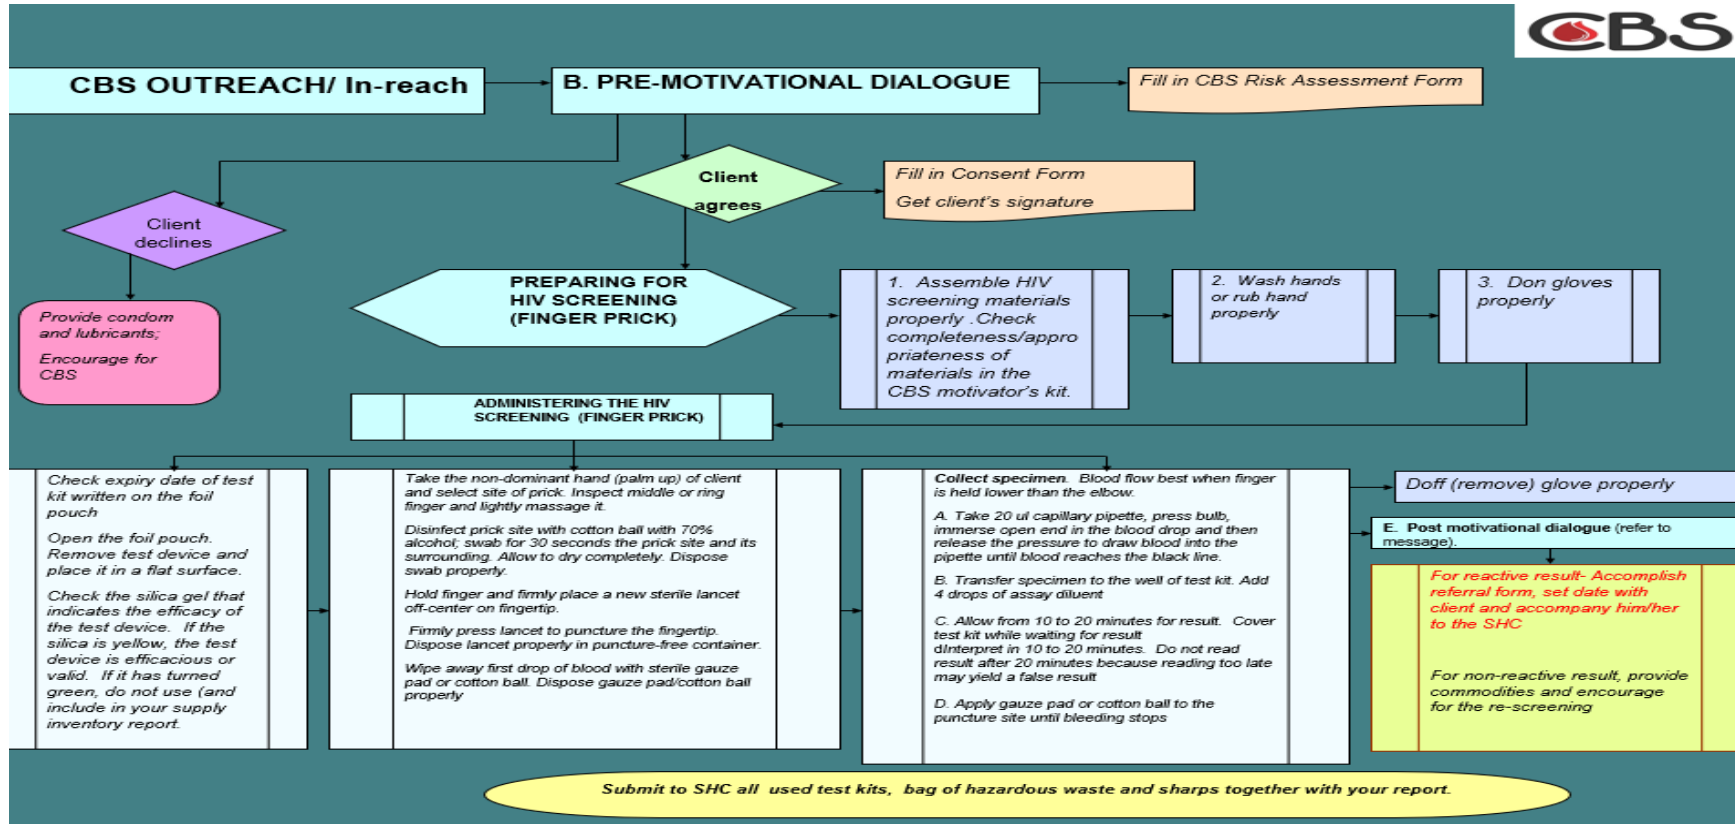

- Trained 20 Peer Outreach Workers in 2017.
- Trained 16 Peer Outreach Workers in 2018.

One-on-One HIV Screening

- One-on-one HIV Screening
- Non-laboratory setting

Community-Based HIV Screening Work Flow Process

Results

QC HIV Testing in 2017

N-28,410

HIV Reactive in 2017

N:813

QC tested in 2018, N: 21,979

Reactive
N:849

CBS Motivators outreach activities

CBS Motivators outreach activities

Challenges

- Concerns on safety when meeting with clients.
- Transportation allowance are not provided.
- Difficulty of bringing and or convincing reactive clients to visit clinics for confirmatory testing.
- Some Motivators were not following cbs protocol.

Conclusions

- Community-Based HIV Screening can actually increase number of HIV testing by 20%.
- It contributed 10% of the total tested reactive or diagnosed PLHIV.
- CBS is strategic to reach high risk and hard to reach MSM and TG.

Recommendations

- To hire more Peer Outreach Workers and include community-based HIV screening training in there capacity building activities.
- To provide them transportation allowance.
- Conduct regular Quality Assurance Activity.
