## FAST-TRACK CITIES 2019

Dear Colleagues,

On behalf of the International Association of Providers of AIDS Care (IAPAC), welcome to the inaugural *Fast-Track Cities 2019* conference. We are proud to host this conference in partnership with the Joint United Nations Programme on HIV/AIDS (UNAIDS) and the Global Network of People living with HIV (GNP+). We are very grateful for the endorsement of London's Mayor Sadiq Khan, who has made his city's HIV response a priority and has advocated the cause of eradicating health inequalities.

In his book the "Triumph of the City," author Edward Glaeser writes that "the strength that comes from human collaboration is the central truth behind civilization's success and the primary reason why cities exist." Since the launch of the global Fast-Track Cities initiative on World AIDS Day 2014, we have witnessed an abundance of human collaboration around our common goals. We have seen entire communities reorganizing around ending urban HIV epidemics. And in so many of these communities, programmatic and other data are demonstrating forward momentum.

In less than five years, this initiative has expanded from an original 26 cities and municipalities to more than 300 whose elected officials have signed the *Paris Declaration on Fast-Track Cities*. In every region of the world, Fast-Track Cities are making great strides in advancing data-driven, equity-based approaches to reach beyond the UNAIDS 90-90-90 programmatic targets to achieve our goal of getting zero new HIV infections and zero AIDS-related deaths. Encouragingly, Fast-Track Cities have also taken on the challenge of eliminating HIV-related stigma, which looms over us as a public health threat on par with the human immunodeficiency virus itself.

In 2018, the *Paris Declaration on Fast-Track Cities* was amended to reflect a more expansive vision of the future through a belief that a high tide can lift all boats. We are thus encouraged by innovative approaches to scaling up primary and combination HIV prevention, addressing syndemic conditions such as mental health and substance use, and integrating the needs of an aging population of people living with HIV into our response across the network of Fast-Track Cities. As important, by leveraging HIV platforms, Fast-Track Cities are striving to achieve the 90-90-90 targets in relation to tuberculosis (TB), and the elimination of the HBV and HCV epidemics.

The Fast-Track Cities calculus for success requires political will and commitment, community engagement, data-driven planning, and equity-based approaches so that no one is left behind. We proudly welcome to *Fast-Track Cities 2019* elected officials, policy-makers, public health leaders, clinical and service providers, and representatives from affected communities – the very people who are implementing the calculus for success – in the hopes of ending urban HIV, TB, and viral hepatitis epidemics by 2030.

I wish you a successful *Fast-Track Cities 2019* conference. May we emerge from our first gathering convinced that our aspirations can be made real, engaged in "communities of learning" that share best practices, and motivated to go the last mile in solidarity with the women, men, and children whose good health is our collective responsibility.

Warmest regards,

Dr. José M. Zuniga  
President/CEO, IAPAC

## INTRODUCTION

*Fast-Track Cities 2019* is the first international gathering of more than 300 cities and municipalities that are accelerating their responses to HIV, tuberculosis (TB), and viral hepatitis – three diseases cited as urban health priorities in the New Urban Agenda as well as the *Paris Declaration on Fast-Track Cities*.

The conference is organized by the International Association of Providers of AIDS Care (IAPAC), in collaboration with the Joint United Nations Programme on HIV/AIDS (UNAIDS) and the Global Network of People living with HIV (GNP+).

The *Fast-Track Cities 2019* conference's aim is to:

- highlight successes achieved across the global Fast-Track Cities network,
- address cross-cutting challenges to accelerating HIV, TB, and viral hepatitis responses, and
- share best practices in HIV, TB, and viral hepatitis responses.

The conference features plenary sessions, panel discussions, oral abstract sessions, and e-poster presentations delivered by faculty members from 144 current and prospective Fast-Track Cities.

## FESTIVAL OF CULTURAL ACTIVITIES

London is a diverse and vibrant city that is playing host to the *Fast-Track Cities 2019* conference. IAPAC is grateful to Fast-Track Cities London for asking London's HIV community to share their work and host various cultural activities throughout the *Fast-Track Cities 2019* conference to reflect the rich cultural heritage and diversity of the London HIV community for the benefit of delegates visiting London and Londoners more broadly. The events showcase some of what London is doing to eliminate HIV, stigma, and discrimination as well as support people living with HIV to live well.

## MEETING VENUE

*Fast-Track Cities 2019* is being held at the Barbican Centre. See the Schedule At-A-Glance and the Venue Map on pages 2-4 for the session room assignments and location.

## MEALS

Complimentary lunch will be provided on Tuesday, September 10, 2019, and Wednesday, September 11, 2019, for attendees of the Lunch Symposia sponsored by Gilead Sciences and IAPAC, respectively. Lunch will be available at the Stalls Foyer. Please refer to the program for the scheduled Lunch Symposia.

## CONFERENCE APP

We have created a mobile app for *Fast-Track Cities 2019*. The app has all the important information you will need to enhance your conference experience. Instructions for downloading the *Fast-Track Cities 2019* app were provided via email prior to the conference. It is strongly recommended that all delegates download the app in order to better engage with the conference and fellow attendees. If you did not receive the email instructions, please download "AttendeeHub" from your mobile device's app store and search for *Fast-Track Cities 2019*.

## INTERNET ACCESS

"The Cloud" and "Barbican Free Wi-Fi" provide a free Wi-Fi service with an initial registration process for new users. Initial registration is a five minute process, after which delegates may use the service for 24 hours before a request to log in again. Once an account is created, it can be used wherever The Cloud is available across the United Kingdom.

## SLIDE PRESENTATIONS/ABSTRACTS

The *Fast-Track Cities 2019* slide presentations will be available at [www.iapac.org](http://www.iapac.org) post-conference. The Program and Oral Abstracts book, as well as E-Posters Schedule at-a-Glance will be distributed at registration, with electronic versions available at [www.iapac.org](http://www.iapac.org).

## VIDEO PRESENTATIONS

In November 2019, IAPAC will disseminate packaged video presentations from plenary sessions and panel discussions that take place in Barbican Hall. These packaged video presentations will also be made available at [www.iapac.org](http://www.iapac.org).
