The City of Johannesburg commits itself to pro-active delivery and the creation of a city environment in 2040 that is resilient, sustainable and liveable. It aims to achieve this through long-term 2040 plans, targeted programmes, services and enabling support that drives economic growth, optimal management of natural resources and the environment, the development of society and the individuals within it, and the practice and encouragement of sound governance, in all the City does.
The GDS principles

• The GDS is underpinned by six principles derived from the development paradigm and affirm the City’s commitment to the objects and duties of local government outlined in the Constitution.

"we can’t hope that the poor will go somewhere else"

"we want growth shared through more employment & opportunities for new market entrants.."

"we want to help people out of poverty!"

"we want to accelerate the restructuring of our city in spatial terms"

"we want better collaboration across spheres of government"

"we want to pro-actively manage local environmental resources"

---

Eradicating poverty

Good governance

Building and growing and inclusive economy

Social inclusion through support and enablement

Ensuring resource security and environmental sustainability

Building sustainable human settlements
