

DECADE OF ACTION

The United Nations' Member-States adopted the 2030 Agenda for Sustainable Development in 2015. At its heart are Sustainable Development Goals (SDGs), each expressing an urgent call for action to be taken by all countries in a global partnership yielding quantifiable outcomes by 2030.

The International Association of Providers of AIDS Care (IAPAC) is actively working to end the epidemics of HIV, tuberculosis (TB), and viral hepatitis at the national, subnational, and municipal levels by 2030 (SDG 3.3). With a decade left to attain this goal, IAPAC recommits to this SDG. We also commit to interconnected SDGs, including no poverty (SDG 1), gender equality (SDG 5), reducing inequalities (SDG

10), and sustainable cities and communities (SDG 11). Particularly in our role as a core partner of the Fast-Track Cities initiative, IAPAC is joining forces with like-minded institutions to ensure that the people whose lives we strive to save and enhance from public health threats must also live in cities that are safe, sustainable, and resilient.

In setting our commitments for a "Decade of Action" to achieve the SDGs, we are guided by IAPAC's mission, the *Denver Principles*, the *Declaration of Alma Ata*, the *Paris Declaration on Fast-Track Cities*, the *New Urban Agenda*, and the promise that the SDGs represent for an improved human condition by 2030. Following are IAPAC's 10 "Decade of Action" commitments that will guide our efforts through 2030.

ACTION 1

Promote beneficence, dignity, equality, justice, and respect for autonomy

ACTION 2

Strengthen and support the role of affected communities through their meaningful engagement

ACTION 3

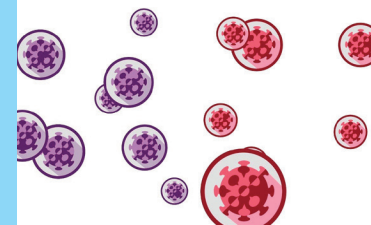

Eliminate HIV-related and intersectional stigma in health settings and within society

ACTION 4

Enhance implementation of quality standards for patient-centered health services

ACTION 5

Improve surveillance and prevention of HIV drug resistance to preserve antiretroviral options

ACTION 6

Foster improved dialogue between HIV prevention and treatment communities

ACTION 7

Coordinate an implementation science agenda to help bridge the science-to-service gap

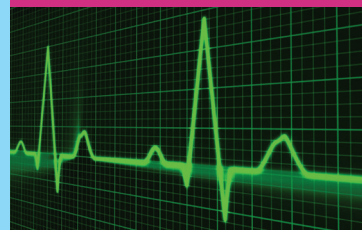

ACTION 8

UNDETECTABLE = UNTRANSMITTABLE

Increase the availability of evidence-based information about HIV, including regarding U=U

ACTION 9

Prioritize the long-term whole health of people living with and affected by HIV

ACTION 10

Leverage innovation to end the epidemics of HIV, TB, and viral hepatitis by 2030
