Sharmila talking to a group of women about TB encouraging them to approach her if they have symptoms

**TAKING TB CARE TO THE COMMUNITY**

I heard from a colleague that some women employed as part of the government's employment guarantee scheme had symptoms of TB. In order to reach them, I organised a community meeting after discussing with the NTEP Senior Treatment Supervisor and the Panchayat leader. I explained all about TB, its symptoms and that free diagnosis and treatment were available. After the meeting, I identified five people with symptoms of TB and am following up with them to ensure they get tested.
