

Navigating the Future of HIV: The Role of Equity, Innovation, and Solidarity in PEPFAR

**Angeli Achrekar, Principal Deputy U.S. Global AIDS Coordinator
President's Emergency Plan for AIDS Relief (PEPFAR)**

Adherence 2022 • November 7-9 • Washington, DC

Summary of PEPFAR's Latest Global Results (FY22/Q2)

12+high burden
countriesReached 90/90/90
treatment targets**19.9**

million

Women, men, and
children on life-saving
treatment – 17.2M in
2021**5.5**

million

Babies born HIV free due to
PEPFAR investments¹**15-****30%**Increase in investments
in vulnerable
populations²

Specifically during COVID...

480%Increase in multi-month
dispensing of life-saving
ARVs**4.3M**

million

People using HIV self
tests in FY21 – 200%
increase since FY19**2**

million

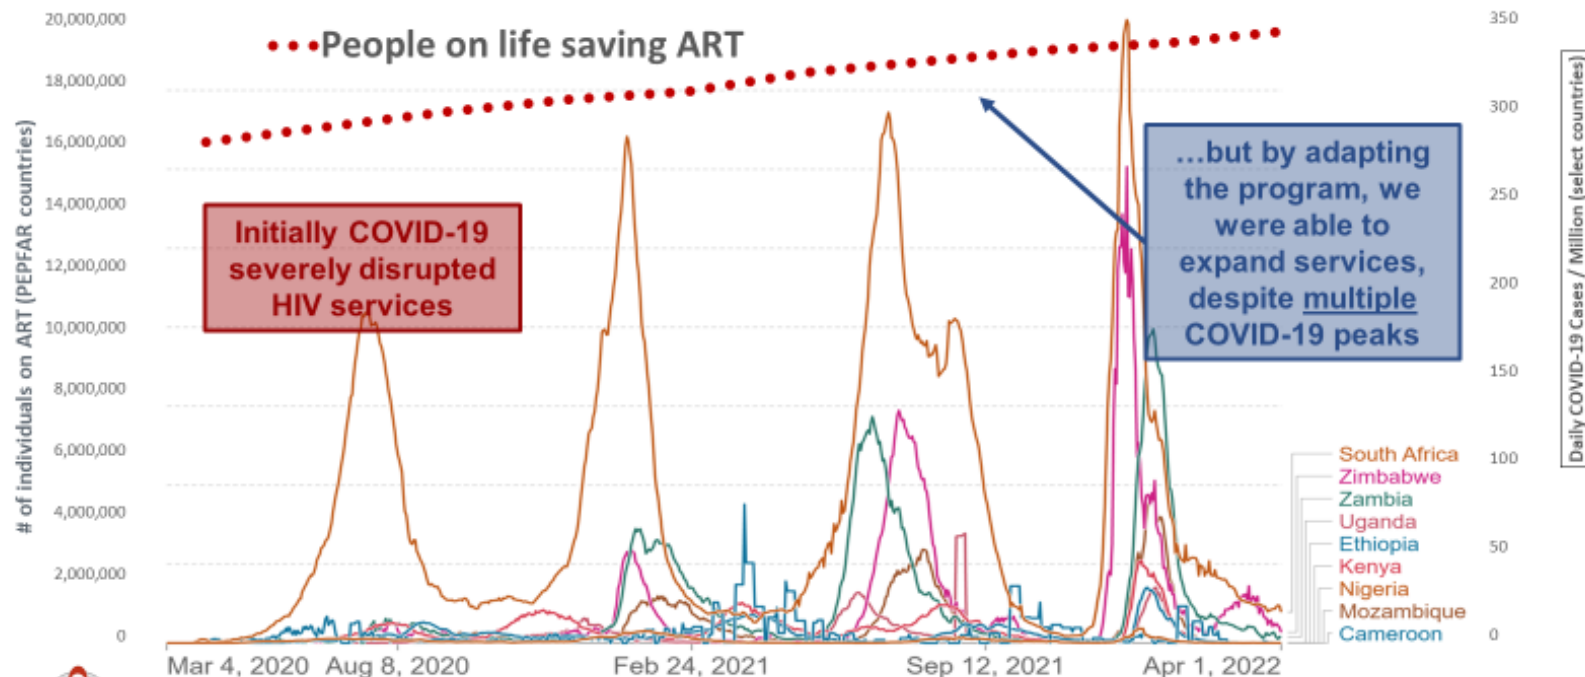

New clients on PrEP
since FY20 – only 300K
in FY20

¹ Includes both reduction in mother-to-child transmission, and the reduction of incidence and prevalence among AGYW, women of childbearing age, and adult men

² Nearly 15% key populations, 20% for adolescent girls and young women, and 30% for children planned for FY23 relative to FY22

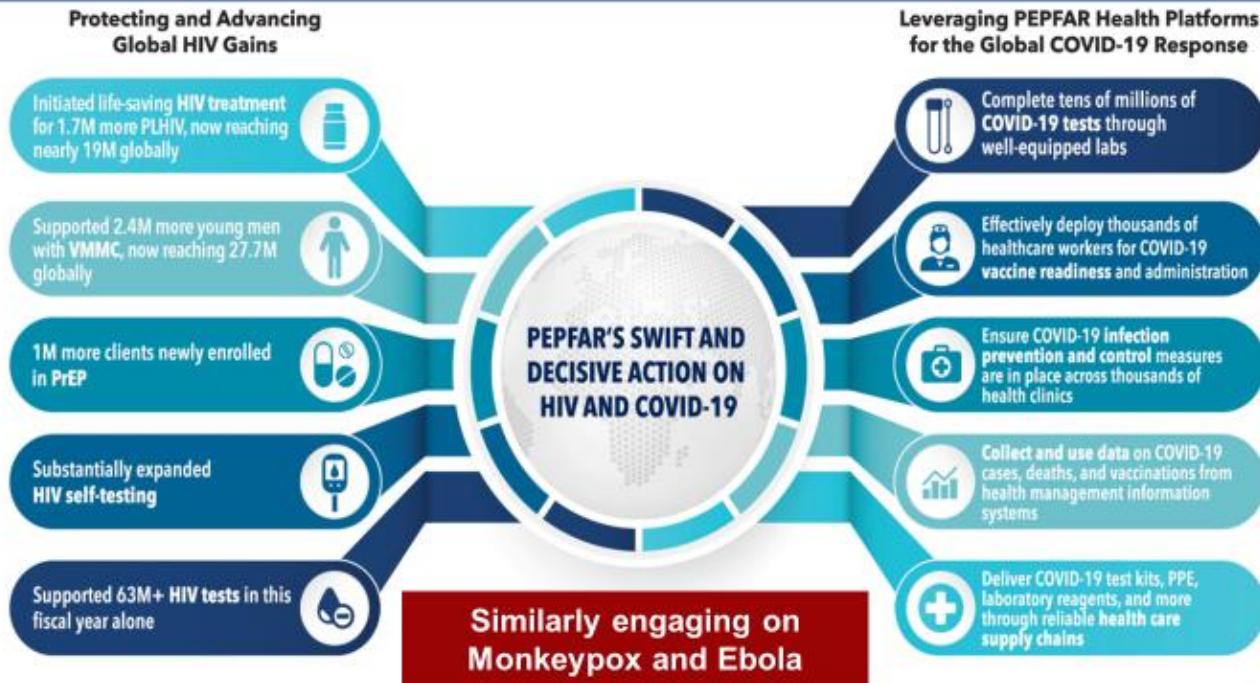

PEPFAR's commitment to the people we serve | Accelerating through COVID-19

Protecting and Accelerating HIV Gains and **Responding to COVID-19**

Adapting programming to protect beneficiaries from COVID-19

Program and policy changes to meet beneficiaries' needs and sustain the program during COVID

1. **3+ month dispensing** of ARVs
2. Enrolling new patients on **PrEP**
3. Expanding **HIV Self Testing**

Global Multi-Month Anti-Retroviral (ARV) Dispensing

Individuals Newly Enrolled On Pre-Exposure Prophylaxis (PrEP)

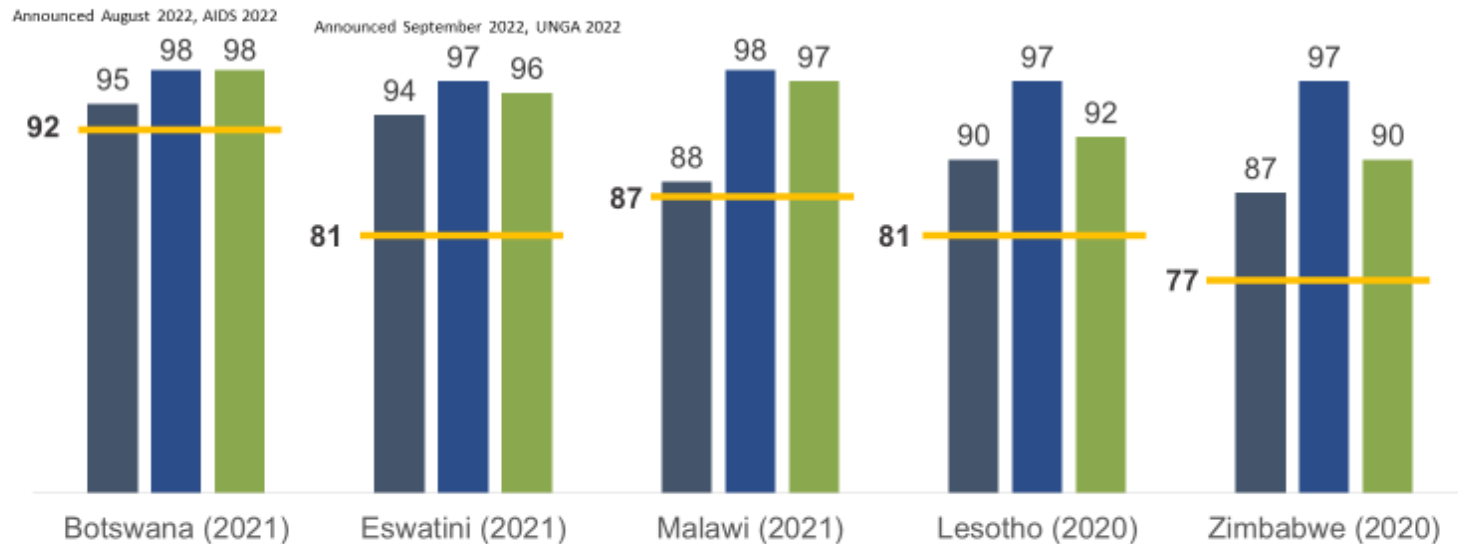

Global HIV Self-Test kits distributed

PEPFAR has driven **previously unthinkable progress** across our partner countries

Progress towards 95-95-95

**PEPFAR**

But: Decline in New HIV infections stalling

Future of PEPFAR | Purpose, Strategic Pillars & Enablers

“Ending the HIV/AIDS pandemic as a public health threat by 2030 and sustainably strengthening public health systems”

1 Health Equity for Priority Populations

Scale-up evidence-based prevention and treatment programs to identify and close the major gaps in new infections for...

1. Adolescent Girls and Young Women (AGYW)

In SSA, **52% of new infections**, despite **only representing 24% of the population**

2. Children

Only **57% of children** living with HIV are receiving ARVs, compared to **80%+ of adults**

3. Key Populations

(i.e., MSM, Female Sex Workers, Transgender People, People who inject drugs, People in prisons)

Often the most challenging population to effectively serve

And need to address the critical policy, programmatic, social & structural barriers

2 Sustaining the Response

PEPFAR is **envisioned as an emergency intervention** to end the HIV/AIDS pandemic. PEPFAR will help to enable **THREE elements of sustainable leadership:**

Political

Programmatic

Financial

...Building Towards a Measurable Sustainability Roadmap

3 Public Health Systems and Security

Leveraging the PEPFAR platform to continue to protect HIV gains and more intentionally aligning investments to directly strengthen core public health systems and security capacity

**Strong National
Public Health
Institutes**

**Modernized Supply
Chains**

**Robust and
integrated Health
Workforce**

**Integrated Lab,
Surveillance and
Data systems**

**Regional
Manufacturing of
commodities**

**Public health for
PLHIV**

4 Transformative partnerships

Global Institutions

Coordinating on setting strategic **priorities**, developing technical **guidance**, aligning **funding** flows, and mobilizing **political** leadership – at global, regional and national levels

Regional Institutions

Philanthropies

Co-designing / **coordinating funding to de-risk** innovative and/or unproven products and service delivery models

Private Sector

Partnering across the **value chain** (R&D, supply chain, digital, delivery) to get products and services delivered in a people-centric way

5 Follow the Science

Behavioral and Social Science

Identifying, scaling-up and sustaining evidence-backed interventions **informed by best practices** in marketing, behavioral economics, social and behavior change communication, and human-centered design

Implementation Science

Investing in **rapid, targeted, transformative implementation science** to support country leadership in scaling-up critical HIV/AIDS products and service delivery models

Community Leadership

Embed community leadership at **all levels** of the HIV/AIDS response from **priority setting to community-led monitoring**

Innovation

Accelerate the time for **innovations** to reach scale and create the enabling **environment for country-led innovations** to develop and thrive

Leading with Data

Working with countries directly to develop **fit for purpose** measures of performance and **integrate data systems**

Thank You!
