

# Usability and Acceptability of an mHealth Platform for People Living with HIV in Washington, DC

Sylvia Caldwell, DHSc, MPH

(Research Scientist, University of Virginia, Charlottesville, VA, USA)

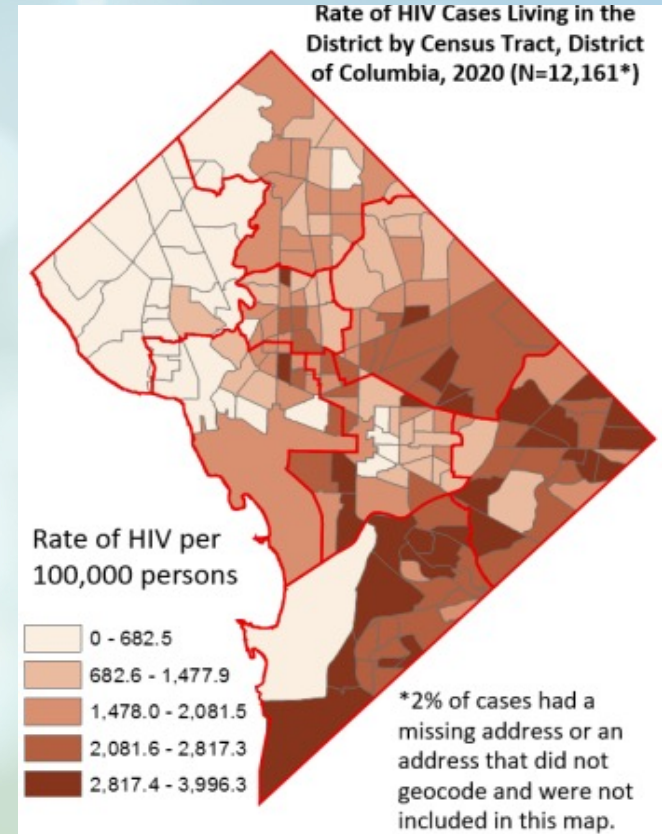

**Adherence 2023 • June 11-13 • Puerto Rico**

# D.C. HIV Statistics

#ADHERENCE2023

- EHE – Priority Jurisdiction
- 12,161 (1.7%) PWH
- >50% of PWH are 50 yrs or older
- Sexual contact is the leading mode of transmission

# The D.C. Cohort Study

#ADHERENCE2023

- Longitudinal multi-site research study of PWH receiving outpatient care at 14 participating clinics in DC
- Goal: Improve quality of care and contribute to body of knowledge of HIV in DC
- Enrollment from Jan. 2011 – present
- >12,200 consenting PWH

# The D.C. Cohort Study

- Database of HIV patients receiving outpatient care inclusive of treatments, diagnoses, lab results, procedures
- Monthly upload of data from sites EMRs
- Active CAB participation
- Close collaboration with DOH; periodic linkage of cohort data and DOH HIV, STD, and other infectious disease databases

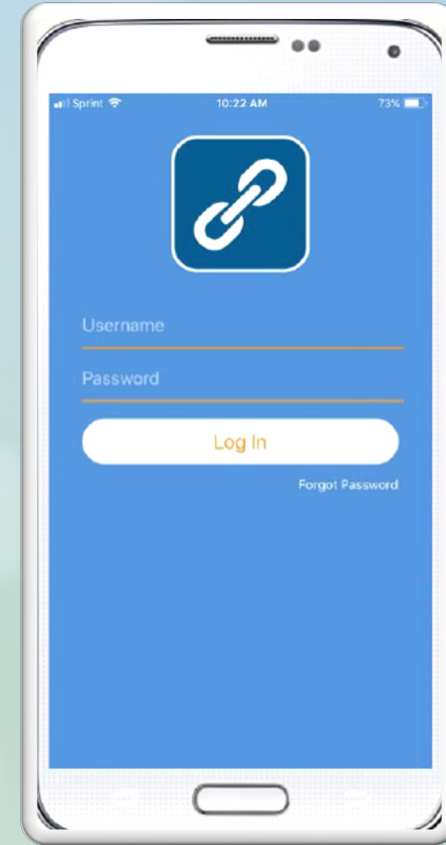

# PositiveLinks (PL)

#ADHERENCE2023

- mHealth app for PWH to improve RIC
- Increased VS and CD4
- Mainly in non-urban settings
- Used by patients and providers
- Endorsed by: CDC, NASTAD, HRSA

# *PL* in the DC Cohort (1R01MH122375-01A1)

- Hybrid effectiveness-implementation design
  - Effectiveness of *PL* on HIV related outcomes (i.e., VS and Retention in care)
  - Implementation using CFIR and RE-AIM
- Cluster randomized trial at 12 Cohort sites
- Three aims
  - 1: Mixed methods formative work to tailor *PL* for DC population
  - 2: Cluster Randomized Efficacy trial
  - 3: Implementation evaluation

# Methods: Aim 1 – Beta Testing

#ADHERENCE2023

- Recruited PWH from participating sites
- Eligibility: Enrolled in DC Cohort, English or Spanish speaking, 16 or older
- Beta testing: Provided access to PL app for 1 month period
- Data collected
  - Demographics
  - App usage
  - System Usability
  - In-depth interviews

# Table 1. Beta Testing Participant Demographics.

N=14

Characteristic	Number	Percentage
Male	9	64%
Non-Hispanic Black	9	64%
Age in years (mean, range)	49	20-74
Education (HS/GED)	5	36%
State of Residence (DC)	13	93%
Spanish speaking	2	14%

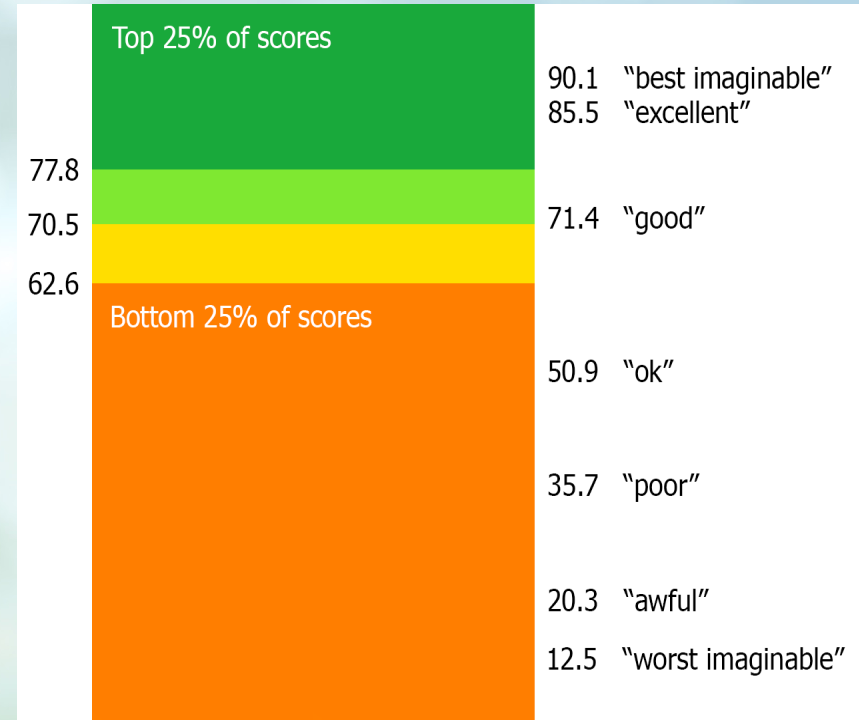

# Table 2: Selected Measures of App Usage

	Mean	SD	Median	Q1	Q3
<b>Response Rate</b>	71.29	35.38	96.5	50	100
<b>Medication Adherence</b>	72.14	33.11	90.5	55	100
<b>Average Mood</b>	1.92	1.98	2	0	3
<b>Average Stress</b>	3.38	2.02	4	1.5	4
<b>Quiz Response</b>	4.57	2.66	5	2	6
<b>Community Post</b>	2	2.51	1.5	0	2
<b>App Launches</b>	42.57	23.31	40.5	21	60.5
<b>Messages Received</b>	4.43	2.16	4	3	5.75
<b>Messages Sent</b>	4.29	3.39	3.5	2	5.75

# Figure 1: App Use Acceptability

- System Usability Scale
  - 10 item questionnaire
  - 5 possible responses
    - Strongly agree – strongly disagree
  - >68 indicates above average usability
- PL SUS Score = 77%

# Qualitative Findings from Beta Testing

- Exit interviews n=14
- Records, transcribed, entered into Dedoose
- 4 coders, each transcript coded by minimum of 2 coders
- Codebook developed via iterative method
- Overall 84% agreement level

# Qualitative Findings from Beta Testing

- Five major themes (code presence)
  - Likes of the App (14)
  - Dislikes of the App (14)
  - App Communications (14)
  - Technical Issues (14)
  - Suggestions (12)

# Table 3: Qualitative Findings from Beta Testing Exit Interviews, N=14

## *Most Applied Codes*

<b>Code</b>	<b>Number of Applications</b>
"Likes" of the app	52
Daily Reminders	23
Medication/mood/stress	21
Suggestions	35
"Dislikes" of the app	23

# Representative Quotes from Qualitative Analysis

*“There’s nothing that I don’t like or that doesn’t look good to me. Everything is fine.”*

*“I liked that it was simplified, simple explanations like under lab results, the answers to those frequently asked questions, explain HIV and just everything it was just simple it wasn’t overwhelming I really like that.”*

# Representative Quotes from Qualitative Analysis

#ADHERENCE2023

*“So I was thinking maybe if there is an option where the person can opt for how many reminders they might want or how long a reminder hangs around or something like that, I’m not sure if that’s an option or not.”*

# Discussion

#ADHERENCE2023

- Demographics mirror HIV population in Washington D.C.
- App response rate = 71.29 / Adherence rate = 72.14
- SUS indicates high usability
- Most discussed theme: “Likes of the app” & “Suggestions”

# Next Steps

#ADHERENCE2023

- Finalize analysis of Aim 1 substudies
- Efficacy trial (Aim 2) currently under way
  - 6 of 12 sites launched
    - 4/6 intervention sites
    - 2/6 control sites
- Implementation data on clinic services and providers collected concurrently with Aim 2
