

Rapporteur - PrEP Track

Adherence 2023 • June 11-13 • Puerto Rico

PrEP Studies

- **Exploration of barriers/facilitators to PrEP use and adherence among specific populations** – Filiatreau et al.; Rodriguez-Diaz et al.; Greenberg et al.; Purrier et al.; Banda et al.; Ngure et al.; Patel et al.; Kelly et al.
- **Social influence/Peer Mentors on PrEP use** – Mwanza et al.; Banda et al.; Musonda et al.
- **Provider training and capacity building among providers** – Delvin et al.

PrEP Studies

- **Social inequities in PrEP adherence persist among publicly insured -**
Crawford et al.; Allen et al.
- **Range of innovative ways for PrEP delivery and maintenance in care -**
Rousseau; Calderon et al.; Morris et al.; Mundende et al.; Cooper et al.; Hill et al.; Hanif et al.; Vanderford et al.; Brooks et al.; Swendeman et al.; Spinelli et al.; Okello et al.
- **Interest in Long-acting Injectable-PrEP –** Brown et al.; Concepcion et al.

Summation

- Adherence is impossible without access to PrEP
- The solution is not limited to having more options when systematic/structural barriers persist
- Address structural barriers with the current options that are available by acting now to reduce disparities
- Tailor interventions to engage and maintain clients in PrEP care
- Optimize the use of Long-Acting PrEP

User Journey with PrEP Adherence
